

JOB POSTING

Associate Engineer/Consultant

Risk Integrity Safety Knowledge, Inc. (RISK, Inc.) is seeking junior level Associate Engineers/Consultants to provide support for Process Safety Management (PSM) and Risk Management Program (RMP) to our clients. Key locations include California, Texas, New Jersey, and Alaska. Key services include hazard and risk assessment, compliance assessment (audits, gap analyses), program development and implementation, short and long term staffing. Hazard and risk assessment services include: project PHAs, FEED through design stage PHAs, procedural PHAs, re-dos and revalidations, upstream and downstream systems. We perform advanced level studies such as Layer of Protection Analysis (LOPA) and a full range of Safety Instrumented Systems services.

Duties:

- Manage and execute multiple process safety/risk management projects under supervision and training of senior staff
- Projects may include audits, assessments, PSM program support, facilitating PHAs (HAZOP & What-If), RMP program support

Requirements:

- Educational requirement AA or above
- Science background - preferably some Chemistry or Petrochemical training or equivalent experience
- Desire to travel 50-75% time
- Highly motivated/disciplined on own
- Effective communicator w/ multiple levels of business
- Familiar w/ industry and/or OSHA/EPA regulations, strong typing skills
- CA or TX location a plus

Submit resumes to: Janet.Benaquisto@psmrisk.com

All resumes will be forwarded to the management team for review. You will be contacted if your resume matches a current opening.
